- Double door maximum size: 99 in wide x 102 in high
- Double door maximum size with mullion transom: 99 in wide x 126 in high

Design Recommendations  
The following design recommendations are guidelines to optimise performance, functionality, durability and budget. Discuss your project's unique requirements with your Product Consultant to ensure your Innotech products support your design and build goals.

Transoms  
Eliminate transoms where possible, especially when the door has an RO height of less than 96 in. tall.

Sidelites  
Sidelites that are less than 16 in. wide may not provide the desired aesthetic.

Overall Width  
To achieve a clear opening of 33.5" the door width should be 41.91"

Sill Options  
Three sill options are available in two heights: high-performance sill, ADA sill and easy access sill. Double doors are not available with ADA sill.

**Notes**

All size limitations refer to one (1) lite door.  
All dimensions are heel dimensions.  
All maximums tested for NAFS compliance.
